

TECHNICAL DATA SHEET

PREVASCALENa6

Degreasing Descaler

PRODUCT DESCRIPTION

Product is not compatible with aluminum. May cause discoloration of certain metals primarily stainless steel and brass

PrevaSCALENa6 has been engineered with a combination of organic solvents and surfactants to penetrate light oils and greases to then aggressively attack and dissolve stubborn scale buildup from mineral deposits such as calcium and lime.

As with most descalers the goal is to dissolve scale fouling from mineral deposits such as calcium and lime. However this descaling can be inhibited by the presence of oils, greases and other contaminants. The safe and effective solvents and surfactants within PrevaSCALENa6 penetrate and emulsify these contaminants allowing for an aggressive attack on stubborn scale deposits. Unlike most descalers PrevaSCALENa6 is phosphate-free, non-fuming and non-corrosive to skin making it a safe and effective choice for the work place and the environment. With no special handling requirements or protective gear necessary during application PrevaSCALENa6 is a user friendly and versatile product that provides true performance while protecting the environment.

CONTAINS: Organic salt

FOR USE IN FOOD PLANTS: PrevaSCALENa6 can be used in food plants provided that there will be no contamination of food while using the product. Food contact surfaces are to be rinsed with potable water before re-use.

APPLICATION AND USAGE

- Heat Exchanger Fouling
- Cooling Towers
- Radiator Condensers
- Vacuum Pumps
- Air & Gas Compressors
- Boilers
- Turbines
- Water Treatment Facilities
- Piping

HANDLING: Monogoggles, rain gear & chemical gloves should be worn when handling this product.

STORAGE: Store separate from caustic materials and bleach. Mixing with bleach will release chlorine gas.

AVAILABILITY: Bulk, Totes, Drums & Pails
